ABOUT US

Founded in 2010, PT. Mella Paint is a leading manufacturer of high-quality floor coatings under the brand MPEX 767 based in Jakarta and Tangerang.

We entered the epoxy sector to meet the growing demand for high-performance solutions in commercial and industrial applications. As epoxy's benefits became widely recognized, Mella Paint emerged as a market leader, offering customer-centric, business-oriented solutions. We continue to innovate to empower employees, inspire clients, and deliver long-term value.

PRODUCTS AND SERVICES

We specialize in producing floor coatings that protect against wear, stains, and chemicals, ensuring durability, safety, and compliance with industry standards. Our coatings extend floor lifespan, reduce maintenance, and provide slip resistance—ideal for high-traffic or hygienic spaces. In addition to producing these high-quality paints, we also offer professional floor coating application services.

Kami ahli dalam memproduksi floor coating yang tahan lama, melindungi dari keausan, noda, dan bahan kimia, serta aman dan sesuai standar industri. Cat kami memperpanjang umur lantai, mengurangi pemeliharaan, dan anti-slip—sempurna untuk ruang dengan lalu lintas tinggi atau yang memerlukan kebersihan rutin. Selain itu, kami juga menyediakan layanan aplikasi cat lantai profesional.

TRUSTED BY

We are grateful to have been given the opportunity to work with these amazing clients who trust Mella Paint for their epoxy flooring needs, allowing us to deliver high-quality solutions while building strong and lasting professional relationships.

COMPANY PROFILE

EPOXY SL (SELF-LEVELLING) FLOOR COATING

Our MPEX767 epoxy self-levelling floor coating creates a seamless, high-strength surface built to withstand heavy foot and vehicle traffic. Applied at a minimum thickness of 500 microns through a primer coat, self-leveller, and top coat, it resists wear, stains, and chemical spills while staying easy to clean and anti-slip. It's the standard choice for warehouses, factory floors, parking structures, and any high-traffic commercial or industrial space that needs a durable, low-maintenance finish.

UV (ULTRA VIOLET) COATING

Applied as a finishing layer over epoxy coating, our UV (Ultra Violet) coating uses UV-curing technology that hardens within minutes rather than hours, so floors return to service faster. The cured layer bonds tightly to the epoxy beneath it, adding scratch resistance and a tougher wearing surface without changing the floor's color or slip rating. It's a practical upgrade for spaces with constant equipment movement, foot traffic, or frequent cleaning, extending the life of the coating underneath and cutting down on how often the floor needs to be redone.

CAT EPOXY LANTAI SL (SELF-LEVELING)

Cat epoxy self-leveling MPEX767 kami menghasilkan permukaan lantai yang rata dan kokoh, mampu menahan beban lalu lintas kaki maupun kendaraan setiap hari. Diaplikasikan dengan ketebalan minimal 500 mikron melalui primer coat, self-leveller, dan top coat, lantai ini tahan terhadap keausan, noda, dan bahan kimia, sekaligus mudah dibersihkan dan anti-slip. Pilihan ini cocok untuk gudang, area produksi pabrik, lahan parkir, dan ruang komersial maupun industri lain yang membutuhkan lantai kuat dengan perawatan minim.

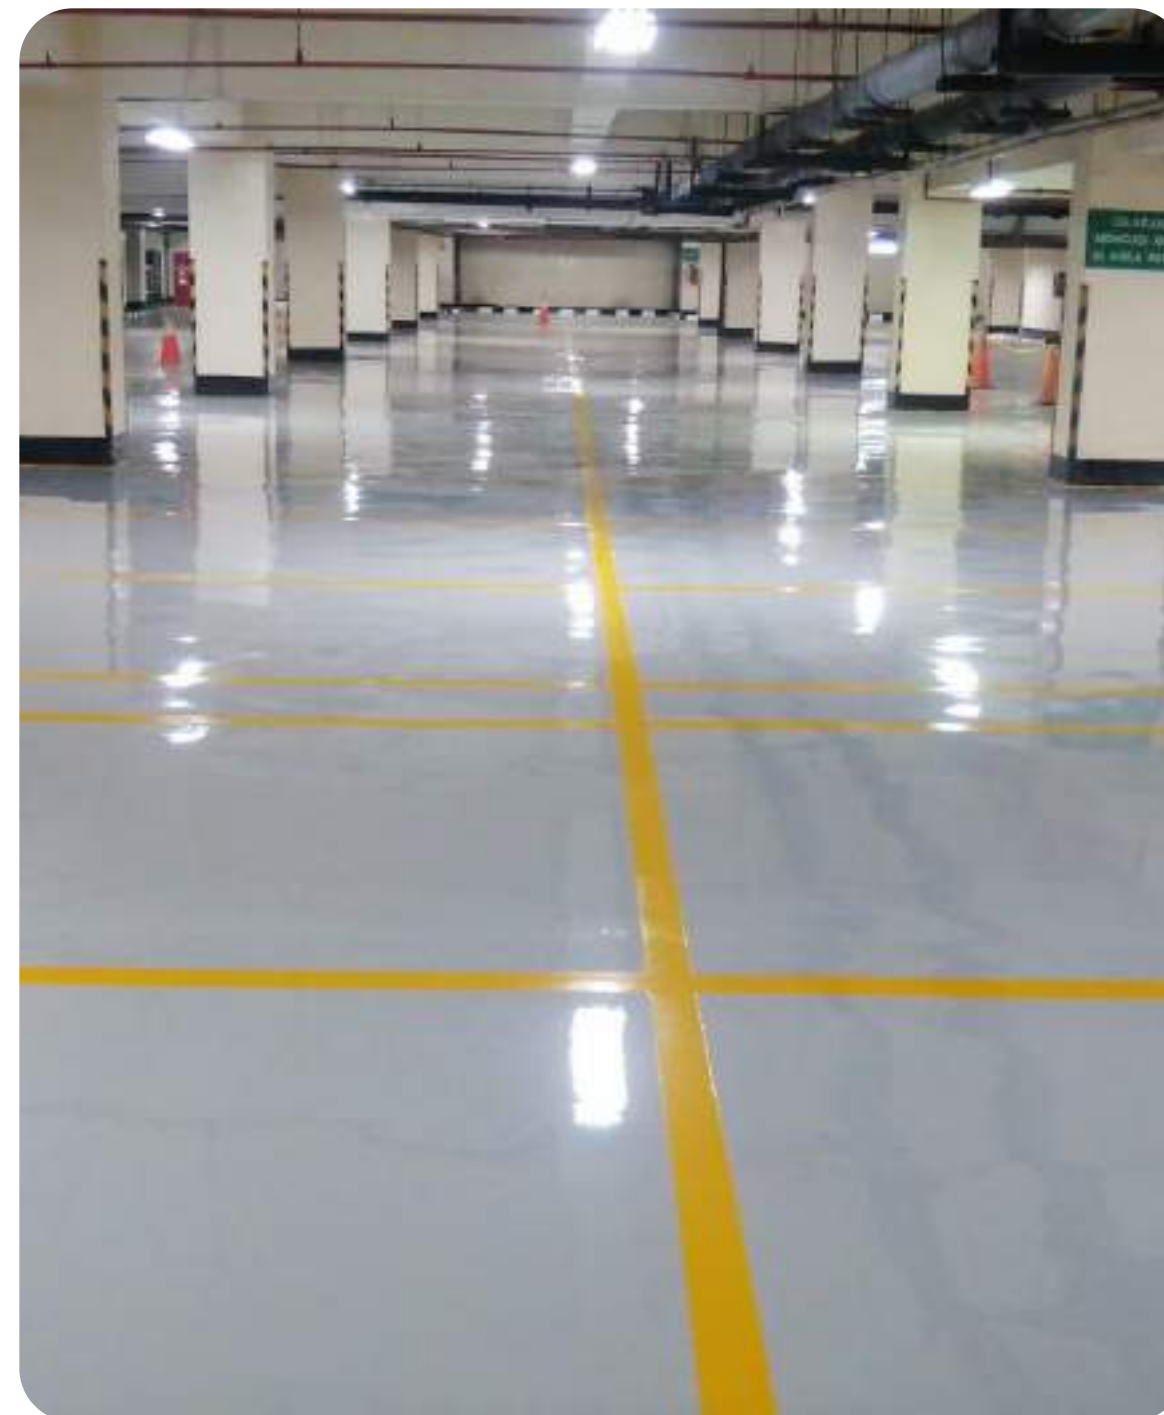

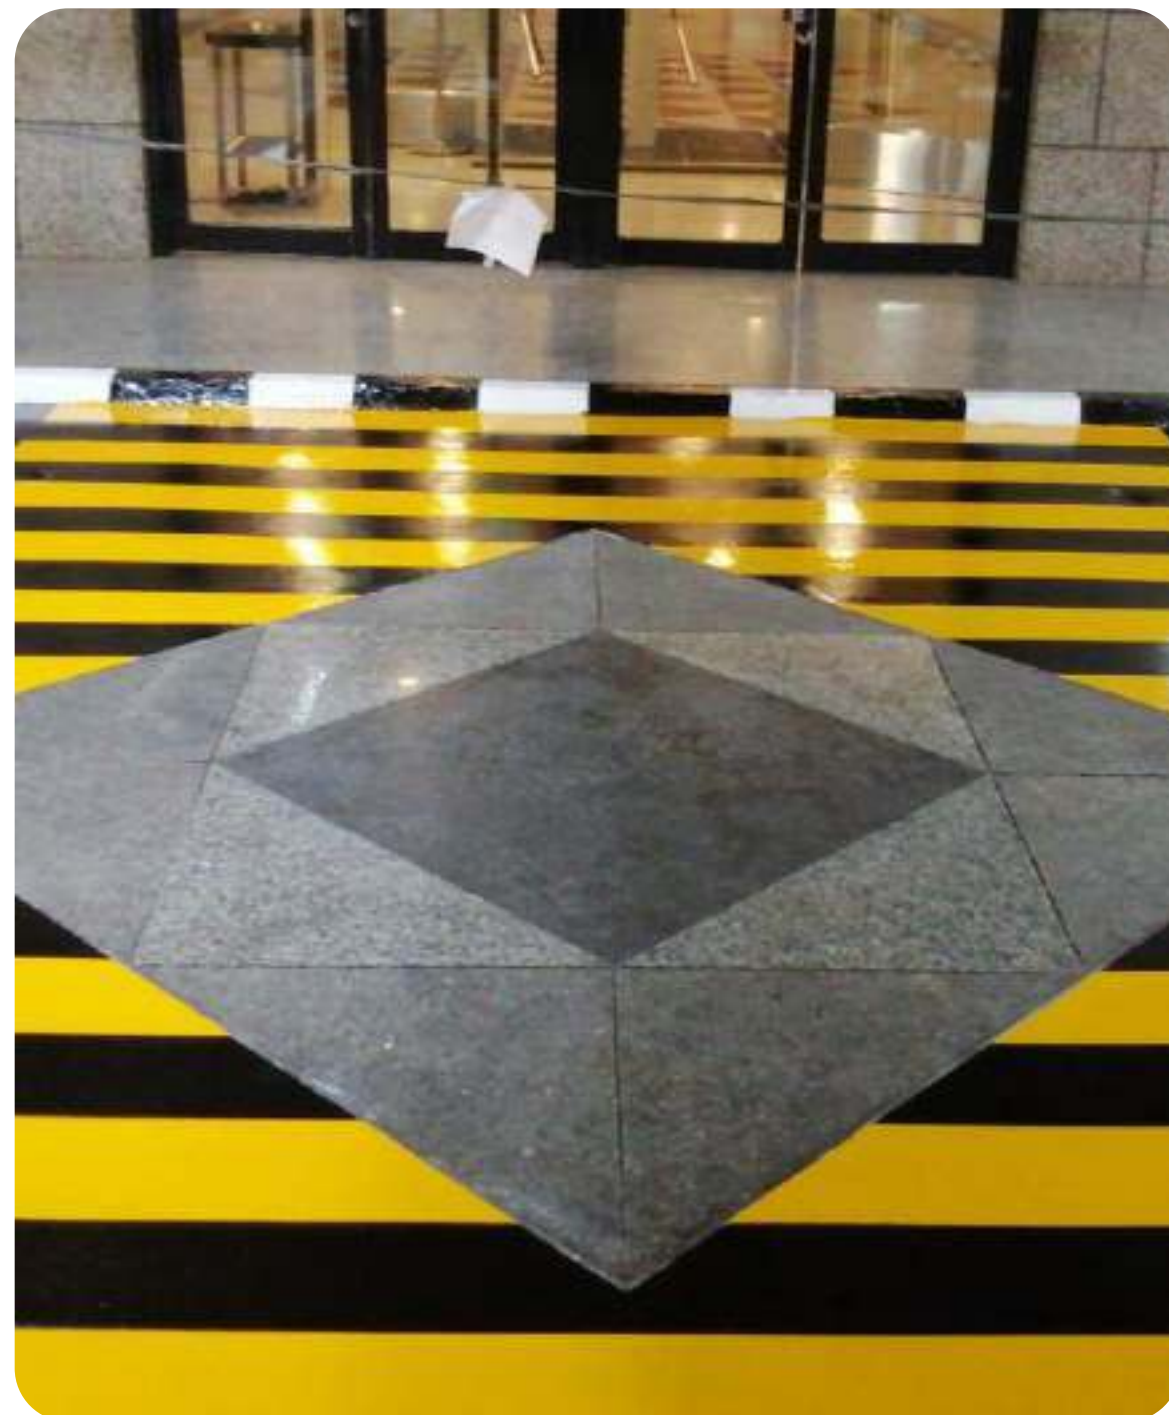

UV (ULTRA VIOLET) COATING

Diaplikasikan sebagai lapisan akhir di atas cat epoxy, UV (Ultra Violet) Coating kami menggunakan teknologi UV curing yang mengeras dalam hitungan menit, bukan jam, sehingga lantai lebih cepat bisa digunakan kembali. Lapisan ini menyatu kuat dengan epoxy di bawahnya, menambah ketahanan terhadap goresan dan keausan tanpa mengubah warna maupun tingkat anti-slip lantai. Cocok untuk ruang dengan lalu lintas alat berat, pejalan kaki, atau pembersihan rutin yang tinggi, karena memperpanjang umur pakai lapisan epoxy dan mengurangi frekuensi pengerjaan ulang lantai.
